- Create and maintain software documentation
- Research emerging technologies/industry trends and apply them in the development process

Requirements:

- At least 2 years of experience in Web development.
- At least 2 years of recent hands-on coding and software design
- At least 2 years of C#/ Java software development experience
- Web server-side development such as ASP.NET Core.
- Experience in JS/TS, HTML5, CSS3.
- Experience with one or more web frameworks & libraries such as Angular / Vue.js / React.
- Experience with asynchronous programming
- Strong understanding of OO Programming.
- Web Unit testing and Automation.
- Team player, strong communication skills, empathy, and initiative
- BSc degree in Computer Science / Software Engineer or another relevant field.
- English – high level of reading, writing as well as spoken

Advantages:

- Development in Service-Oriented environment.
- Experience in complex architectural design.
- REST APIs or Microservices Architecture.
- OAUTH / OpenID Connect.
- Big Data Analytics or data stream processing
- Document store database systems: MongoDB, Couchbase etc.
- Working as Agile team member.

General Information:

- Full time position.
- Start Date: Immediate.
- Location: Technology Center – Beer Sheva
